

think beyond green

Think beyond green

Blue Ribbon Posts and Poles are the environmentally sound choice for agriculture. They have a life cycle that *starts green, stays green and remains green* for years to come.

We start green by using wood, the world's only renewable building material. All Blue Ribbon wood products come from sustainably managed forests.

We stay green by pressure-treating with environmentally friendly AQUA SEAL® water-borne preservatives. Blue Ribbon wood products pressure-treated with AQUA SEAL have been EPA approved for use in agriculture.

We remain green by producing pressure-treated wood products that last substantially longer than untreated wood products. Treated Blue Ribbon wood products have the longest service life in agriculture. When you specify Blue Ribbon posts and poles, fewer trees are used, and you help conserve our forests.

Renewable

Think beyond green is making environmentally sound resource choices:

- 🌿 Blue Ribbon posts and poles are produced from timber harvested in sustainably managed western forests
- 🌿 Qualified, graded and sorted from straight, fine grained, tight-knot Lodgepole Pine
- 🌿 Sharp, high-carbide knives limit visible rings and skips
- 🌿 Responsible manufacturing practices ensure workplace health and safety

Sustainable

Think beyond green is adherence to strict certified pressure-treating standards:

- 🌿 Blue Ribbon posts and poles pressure-treated with AQUA SEAL are clean, odorless and safe to handle
- 🌿 Environmentally friendly AQUA SEAL is a water-borne copper oxide formulated preservative
- 🌿 Deep preservative penetration locks in protection without leaching
- 🌿 Fully compliant with all applicable EPA, Environment Canada and Code of Good Practice requirements

Dependable

Think beyond green is consistently exceeding tight manufacturing tolerances:

- 🌿 Blue Ribbon posts and poles are produced in uniform sizes:
Diameters from 3" to 9"
Lengths from 5' to 30'
- 🌿 Premium blanks are graded to consistent diameters with minimal taper:
Less than 1" per 8' in length
- 🌿 Double end trimmed specified lengths:
Cutting tolerance of +/- 1"
- 🌿 Precision finish options include:
Full peel, doweled, natural bark
Blunt, pencil pointed, capped

Our Guarantee

Think beyond green is committing to 100% usable products with a lifetime of service:

Blue Ribbon posts and poles are made with high quality, well maintained equipment that is routinely monitored by independent testing agencies. All Blue Ribbon finished products are regularly inspected for strength, straightness and grade.

Treated Blue Ribbon posts and poles are pressure-treated with AQUA SEAL in accordance with AWP Standard C4 and System Standard UC4A. AQUA SEAL copper oxide formulated, water-borne preservatives meet AWP Standard P5.

AFFILIATED RESOURCES, INC.
