**Affiliated Resources, Inc. Announces
New Industry First Coating For TRED-eXtra® Panels**

PORTLAND, OREGON DECEMBER 27, 2008—Affiliated Resources, Inc. has developed a new coating for TRED-eXtra panels for mezzanine floor systems. The new coating called, “Titanium 10K” is able to withstand 10,000 cycles on the Taber Abrasion Test (ASTM D-4060-95) when coated on a TRED-eXtra substrate. The 10K coating is available on TRED-eXtra panels immediately.

Affiliated Resources engineers and manufactures the TRED-eX® line of Panels for Mezzanine Floor Systems for distribution centers across the United States and Canada. More information can be found at www.tred-ex.com
